

**Color Compass  
Corporation**

**“North America’s Auto Collision  
Equipment Leaders”**

*Training isn't just a promise; it's a cornerstone of our business culture. Our comprehensive training program spans every level of shop operations, designed to empower our shop partners and maintain the overall health of the entire shop.*

*The Color Compass & Wesco team is highly trained and takes full responsibility for all technical support at the shop level.*

## **The North American Premiere Paint & Equipment Supplier**

- **Automotive Refinish Supplies**
- **Equipment Solutions, Facility Layout & Design**
- **13 Training Centres - Providing Courses & Clinics**
- **Inventory Management Innovation**
- **220+ Locations Across the US & Canada To Serve You**

## Total Equipment Needs.

We carry only the highest quality, highest performance equipment backed by a team of experts dedicated to improving production in your shop.

# Welding

# Frame Racks and Measuring Paint Booths and Prep Stations

# Repair Stations

# Filtration

# Spray Equipment

# Dust Collection

and so much more...

## PRO SPOT

QUALITY WELDING SYSTEMS

The Pro Spot equipment line includes resistance spot welders, aluminum & steel dent repair systems, pulse MIG welders, rivet guns and tools, dust-free sanding systems, fume extraction and more.

**OEM APPROVALS:** Pro Spot owns three patents for special welding equipment and applications and works with the largest auto manufacturers in the world.

We work consistently with leading OEMs on upcoming changes to the industry as well as new vehicles preparing to enter the market, in order to assure that we have the proper equipment to repair the vehicles once they hit the street.

**Pro Spot's products are approved by top manufacturers around the world.**

## CAR-O-LINER®

**Car-O-Liner® is synonymous of innovation** thanks to the development of its first alignment bench, setting the stage for the company's remarkable journey of growth.

Today, Car-O-Liner® stands as **the world's leading provider of high-quality, technologically advanced collision repair equipment for the automotive aftermarket**, with a presence in more than 70 countries.

*For over half a century, we have been dedicated to supplying the industry with innovative solutions, driving technical advancements, offering comprehensive training, and providing steadfast customer support.*

Born out of **BETAG's work with OEMs** to develop technical repair solutions for the materials used to manufacture today's outer panels, **BETAG produces a comprehensive range of advanced repair equipment, designed around the technician, to enable them to work precisely and efficiently.**

As the percentage of non-structural outer panels continues to increase, BETAG's outer panel repair 'toolbox' is divided into 8 compartments - and can be customized according to actual work mix and volume (within the overall shop or individual work bay).

All of BETAG's tools complement each other, **giving technicians the opportunity to use different repair methods and techniques in combination with each other**, to complete a wide range of high quality outer panel repairs, in accordance with OEM standards.

Our goal is to provide collision repair shops like yours a total repair solution across our **Chief Collision Technology products. From diagnostics and measuring to pulling, welding and structural repairs, we help you work efficiently, safely and accurately.**

Our products combine sophisticated technology with easy-to-use displays and controls. **Plus, we do our best to bring you the very latest OEM specifications**, so you can make better repairs with better results and do so more profitably.

*Chief offers the most extensive collision repair product line in the industry, but we realize that different shops have different needs. So we aggressively develop and launch innovative products that enable shops of all types and sizes to become more productive and successful. **Precision, selection, service and value.***

## Eclipse Plus Electronic Measuring System

Need the fastest, most accurate laser measuring system ever devised? **The Eclipse Plus Electronic Measuring System combines a polar laser scanner with portable Live Targets and Intelligent Stems** positioned by the body technician at strategically marked frame or body points.

Each sweep of the laser precisely locates each of the targets, which then transmit the measurements to the computer and its database of manufacturer specifications.

*As the pulling process begins, the Live Targets' verification lights change to indicate severity of damage – to red, yellow or green depending on closeness to manufacturers' specifications. **When all lights are green, the frame is restored to its proper measurements.***

## Complete Compressed Air Solutions

We manufacture reliable industrial air compressors built to perform in demanding environments. Made in North America

- **100% Duty Cycle Operation**  
ideal for Continuous-use Applications
- **Powerful, Efficient Delivery**  
Variable speed or Fixed speed Belt Drive
- **Innovative Design**  
Compact, Quiet, engineered for Optimized efficiency & Performance
- **Integrated Air After-Cooler**  
effectively Cools Air & enhances system efficiency
- **CSC300 Controller**  
Advanced Control solution
- **5 Year Limited Warranty**  
Rugged Construction & Long Life

**A leader in paint booth technology**, Global Finishing Solutions® (GFS) manufactures an extensive line of high-performance paint booths, prep environments, mix rooms and curing technology for automotive body shops and collision repair centers across North America.

With an extensive history in the finishing industry, **GFS is experienced at designing and building high-quality paint finishing equipment** — from the premium Edge™ Paint Booth, the efficient Ultra® Paint Booth line and the budget-friendly Performer® Paint Booth line to the innovative REVO Accelerated Curing Systems.

*Alleviate your shop's bottleneck and increase cycle times with a new Ultra Paint Booth from Global Finishing Solutions (GFS). Premium contamination control, effective overspray capture and exceptional lighting in GFS Ultra Paint Booths allow for flawless paint finishes, enabling you to reduce rework and improve productivity.*

**Nova Verta USA offers a wide variety of automotive paint booths, truck paint booths, and industrial paint booth applications.** With three distinct operating modes and indirect heating systems, no other manufacturer's system offers the start-to-finish spray paint booth operating efficiencies available from Nova Verta.

*Nova Verta leads the industry incorporating **Total Control Technology**. This technology features **self-diagnostics, automated pressure control using variable frequency drive (VFD standard on all models); eliminating pressure control dampers**. The Total Control System incorporates better control of paint booth pressure and airflow, and it provides maintenance reminders, ensuring longevity of the paint booth equipment. Additionally, a complete maintenance log can be viewed from the convenience of the operator station. The Total Control Technology **conserves energy, lowering consumption by as much as 40%** over typical booth control systems.*

*Equipment updates are also made easier, using an e-prom chip and/or PCMI card.*

## Aluminum repair Area - Curtains

**Low-cost, high-value solution for achieving "Aluminum Repair" compliance.** These curtains help you avoid costly reworks by ensuring proper area separation, while allowing the use of existing light without the need for complicated or expensive roof frameworks. Say goodbye to costly brick-and-mortar walls and hello to a flexible solution that separates conflicting tasks within your work environment.

*Our curtains quickly **create privacy areas, improve working conditions, and easily slide out of the way when not needed.** They help control contaminants, temperature, sound, and light, enhancing your workspace. Installation, cleaning, and replacement are a breeze, and we offer a five-year warranty on the curtains and a lifetime warranty on all hardware.*

*Transform your workspace with our Aluminum Repair Area Curtains today!*

spectratek™  
**InstaCure**

Working from its state-of-the-art research and testing facilities in North America, a top team of designers, technicians and LED experts created - in cooperation with the coating industries - the **SPECTRATEK UVLED lamps** destined to revolutionize UV-A curing in the car body repair industry. Cordless & Handheld High A UV LED curing lamp powered by a rechargeable battery.

*Designed and built in North America for worldwide **use on all current ultraviolet light curable fillers, base coats (primers), top coats, and clear coats.** Faster, safer, and more efficient than any other conventional UV curing system for automotive repair and industrial finishes.*

A wide selection of **high-quality, user-friendly, space saving short-wave infrared (IR) and ultraviolet (UV-A) IRT dryers.** A combination of 50+ years of curing know-how, high-end parts, sophisticated software and inhouse/third party/user tests will cure your material 100%, every time. IRT mobiles and rail dryers provide reliable, high quality results with advanced curing technology that is easy to use.

*They are **designed for the workshop, to save floor space and speed up the repair job process.** IRT provides maximum productivity in the body shop, always considering health and safety regulations.*

**SATA spray guns guarantee perfect finishes through their excellent precision and highest quality.**

Choose the most suitable technology according to your personal needs - our spray guns are available with RP as well as with HVLP technology.

*The breathing protection masks from SATA, whether as a full or half mask, convince with the highest level of breathing protection, enhanced durability and wearing comfort.*

*The SATA protection masks guarantee a high level of health protection and are therefore highly appreciated among painters.*

The **SATA** holds a leading position worldwide in the field of wet paint technologies and, besides Germany, supplies distribution partners in about 100 countries worldwide.

In addition to the technologically outstanding **SATA spray guns**, other products such as **cup systems, breathing protection systems and compressed air technology** make SATA a system supplier for users such as vehicle partners, industry, carpenters and painters.

German Engineering

## DEVILBISS

AUTOMOTIVE REFINISHING

With years of **building solutions for the automotive spray paint guns**, DeVilbiss Automotive Refinishing understands industry technology and trends to ensure that our automotive spray paint guns fit many applications. We know nothing is more valuable than the "Wow" factor when delivering the finished product to your customer.

We aim to equip painters with the necessary automotive spray paint guns to make this possible.

*We provide sustainable and innovative solutions that will **save you money by decreasing the amount of paint wasted and reducing time spent.** Working faster means higher throughput, which in turn leads to higher revenues.*

## ANEST IWATA

As a global brand, Anest Iwata aims to deliver **the most technically-advanced spraying equipment** on the market. When designing our products we think about highly professional and creative individuals who have a passion for painting and are looking for the greatest performance.

Anest Iwata **combines the most sophisticated Japanese craftsmanship tradition to the continuous search for leading-edge technologies.**

## NORTON

SAINT-GOBAIN

A customizable mobile work station, designed with the technician in mind, the **Norton VAC RACK brings dust extraction to the next level.** This bundle includes the essentials needed for most sanding applications, allowing easy access to Norton abrasives, tools, and accessories to complete a job. Using the Norton VAC RACK **results in a cleaner and healthier working environment, better finish, and reduced abrasive costs.**

### **Organization and Proficiency**

- *Versatile design and enclosed storage area allows for customization improving cycle times and reducing waste*
- *"Stay put technology" hooks are durable and perfect for holding 1 box of abrasive discs for convenient and easy access*
- *Sturdy and Mobile*
- *Compact, smooth-edged design to maneuver tight spaces effortlessly*
- *Caster locking wheels and vacuum strap provide extra stability*

## PRO-CART

**PRO-Carts** are designed to **enhance efficiency and organization** in various work environments. These carts feature wire mesh adjustable folding shelves, allowing for flexible storage solutions that can be tailored to specific needs. With a **robust 150 lb capacity**, they can handle a variety of parts and tools. The **inclusion of panel trains and extending arms provides additional versatility**, making it easier to transport and access items.

Constructed from **durable tubular steel**, these carts are built to withstand heavy use. The **4" stainless and polyurethane locking casters** ensure smooth mobility and stability when needed. **Bin rails are included** to hold plastic bins, perfect for organizing smaller parts.

Additionally, the **DFR tray holder offers options for panel trains and an RO holder, further enhancing the cart's functionality**. These features make PRO-CARTS an excellent choice for **maintaining an organized and efficient workspace**.

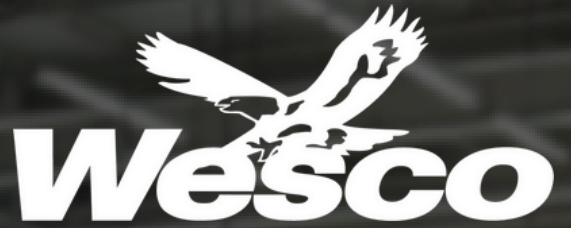

The **PRO-STAND parts stand** is engineered for heavy-duty use, boasting an **impressive 500 lb capacity**. This makes it ideal for handling substantial parts and equipment. Its design includes flexible feet at the base, which provide **exceptional stability on grate flooring and in paint booths**. This ensures that the stand remains steady and secure, even in environments where the flooring may be uneven or slippery.

*The combination of high capacity and stability features makes the **PRO-STAND parts stand** a reliable and practical choice for various industrial and automotive applications.*
